SPACE-TRAC™
PUTTING YOUR SPACE ON TRACK

Space-Trac Manual Carriage Retrofit "Boot" Design
Tech Data Sheet

Space-Trac's high density storage systems are very effective in saving space, and or increasing storage capacity up to 75% in the same foot print. They eliminate the need for several access aisles. The mobile shelves move along floor tracks requiring the need for only one aisle or no aisles with our Pull out design. When an item is required, the particular shelving bay is identified and by moving Space-Trac mobile units apart or pull out, creates access. The mobile shelving is easily opened and closed with little effort.

Space-Trac Mobile "Boot" rivet shelving retrofit kits, Pull out Design

Kits consist of the following:

- **Guidance track – Designed per order**
- **(4) Boot Tubes**
- **(4) Wheels/Bearings**
- **Hardware**
- **(4) Block Wedges**
- **(4) Threaded Axle (only pull out)**
- **(2) Stabilizing Axle Tube (only pull out**
- **NOTE: Pull Out kit shown, incudes the axle and stabilizing tube. Not used on Lateral or side by side designs!**

Space-Trac Mobile "Boot" rivet shelving retrofit kits are design to retrofit rivet shelving, must be Steel.

Retrofit "Boot" design utilizes Block wedges to secure the shelving upright to the Boot tubes.
